

## What will work best for you?

**Minoxidil Maximum Strength 5%** is an FDA-approved hair regrowth solution for **use by men only**. The ingredient propylene glycol ensures that the applied Minoxidil is evenly spread across the affected area and easily absorbed through the skin. **Minoxidil 5% is FDA approved and clinically proven to regrow hair.**

**Minoxidil Regular Strength 2%** is an FDA-approved hair regrowth solution **for men and women**. The native ingredient, propylene glycol, ensures that the applied Minoxidil is evenly spread across the affected area and easily absorbed through the skin. **Minoxidil 2% is FDA approved and clinically proven to regrow hair.**

### Intervention:

Healthy hair follicles become unhealthy when they don't receive the proper nourishment. AnaGize's exclusive combination of selected nutrients and minoxidil are designed to facilitate the normal function of hair follicles by increasing cell metabolism, correcting unhealthy scalp conditions, and removing topical DHT that builds up and clogs pores that, in turn, smother the hair follicle; these actions help to strengthen each individual follicle.

Each product in AnaGize's healthy hair and scalp regimen has been synergistically developed to deliver maximum results toward normalizing, and ultimately creating a healthy and abundant growth environment. The net effect is that the reduction of hair loss and the promotion of stronger, fuller, and healthier looking hair starts with AnaGize, today's new science for fine, thin or thinning hair.

HEALTHY HAIR & SCALP REGIMENT

## If You Want To Re-Grow Your Hair, Don't Leave Anything To Chance.

*Hair loss is a serious matter. It is best addressed by a hair professional rather than a drug store employee. If you have considered minoxidil as a solution, it is important to learn how this treatment will work best for you. This brochure is the first step in that education. Please consider this opportunity and call us with any questions you may have.*

## AnaGize™ Hair Therapy For Men and Women is a series of hair and scalp products created to fight the causes of hair loss in men and women.

Most hair loss is androgenic in nature. That is, it's caused by the hormone testosterone, which is present in the scalps of both men and women.

When testosterone is not "broken down" and eliminated by the body's natural metabolism, the result is a residue of dihydrotestosterone (DHT)—that causes the hair follicle to deteriorate and stop producing hair.

## Not All Hair Loss Is Testosterone Related

While the majority of hair loss is caused by an excess of DHT in the scalp, there are other metabolic and systemic factors that can lead to excessive hair loss.

These may be caused by vitamin deficiencies, stress, hormonal imbalance such as those caused by pregnancy, drug interactions and other factors. The AnaGize Healthy Hair and Scalp Regiment addresses these causes as it relieves androgenic or hormone related factors.

## Why Minoxidil Alone May Not Be Enough

By now, almost all of you know that minoxidil is the only topically applied formulation approved by the federal Food and Drug Administration (FDA) as a treatment for reducing excessive hair loss and promoting new hair growth.

You also probably know that the effects of minoxidil vary from individual to individual, in both men and women. Minoxidil is approved in a 5% concentration for men and 2% for women, as found in the AnaGize System.

## A Synergistic Approach

With the AnaGize System, its minoxidil formulation will be more effective when optimal conditions for hair growth are achieved along with its regular application.

This includes shampoo and conditioners that promotes thicker, healthier hair growth. This is a formulation that cleans the scalp of the topical DHT that inhibits hair growth; nutrients that lead to healthy, thicker hair and finally, a minoxidil solution individualized for either men or women that the FDA endorses as a means to new hair growth.

## The AnaGize Regiment

AnaGize is conveniently prepared in a daily regiment prepackaged for easy in-home use. The daily regiment includes the following products:

**Scalp Therapy Cleansing Treatment** is a unique dermatological scalp treatment developed specifically to treat scalp disorders associated with fine, thin or thinning hair. It removes topical DHT, which can lead to hair loss.

*AnaGize is conveniently prepared in a daily regiment prepackaged for easy in-home use.*

## AnaGize Healthy Hair & Scalp Regiment is available in three packages:

- 5% Minoxidil Topical Solution for Men
- 2% Minoxidil Topical Solution for Men & Women
- Bio-Active Serum alternative for Women

## Balancing Treatment (Sulfate Free) Shampoo

is a rich, yet gentle, organic treatment that provides proper balance of strength and moisture to the hair as it cleans. Polypeptides, amino acids, and vitamins work synergistically to add body, elasticity, thickness and luster to thin or thinning hair.

**Stabilizing Body Conditioning Treatment** adds volume and strength to thin or thinning hair without adding weight, which can lead to accelerated hair loss.

**Inter-Balance Complex** is a natural daily vitamin supplement that enhances the body's ability to block unnecessary and unwanted negative cell activity. It increases the natural alignment of proper cellular inter-balance.

**Bio-Active Serum** is a natural alternative to Minoxidil that has been found to be effective by many users, although it has not received FDA approval as a hair growing solution. Bio-Active Serum is an alternative to women who are nursing or for people who are concerned about the side-effects of Minoxidil.
